ELEMENTS

contains slides, masterSlides.

PROPERTIES

id (text, r/o): Document ID.

slideNumbersShowing (boolean): Are the slide numbers displayed? documentTheme (Theme): The theme assigned to the document.

autoLoop (boolean): Make the slideshow play repeatedly.

autoPlay (boolean): Automatically play the presentation when opening the file.

autoRestart (boolean): Restart the slideshow if it's inactive for the specified time

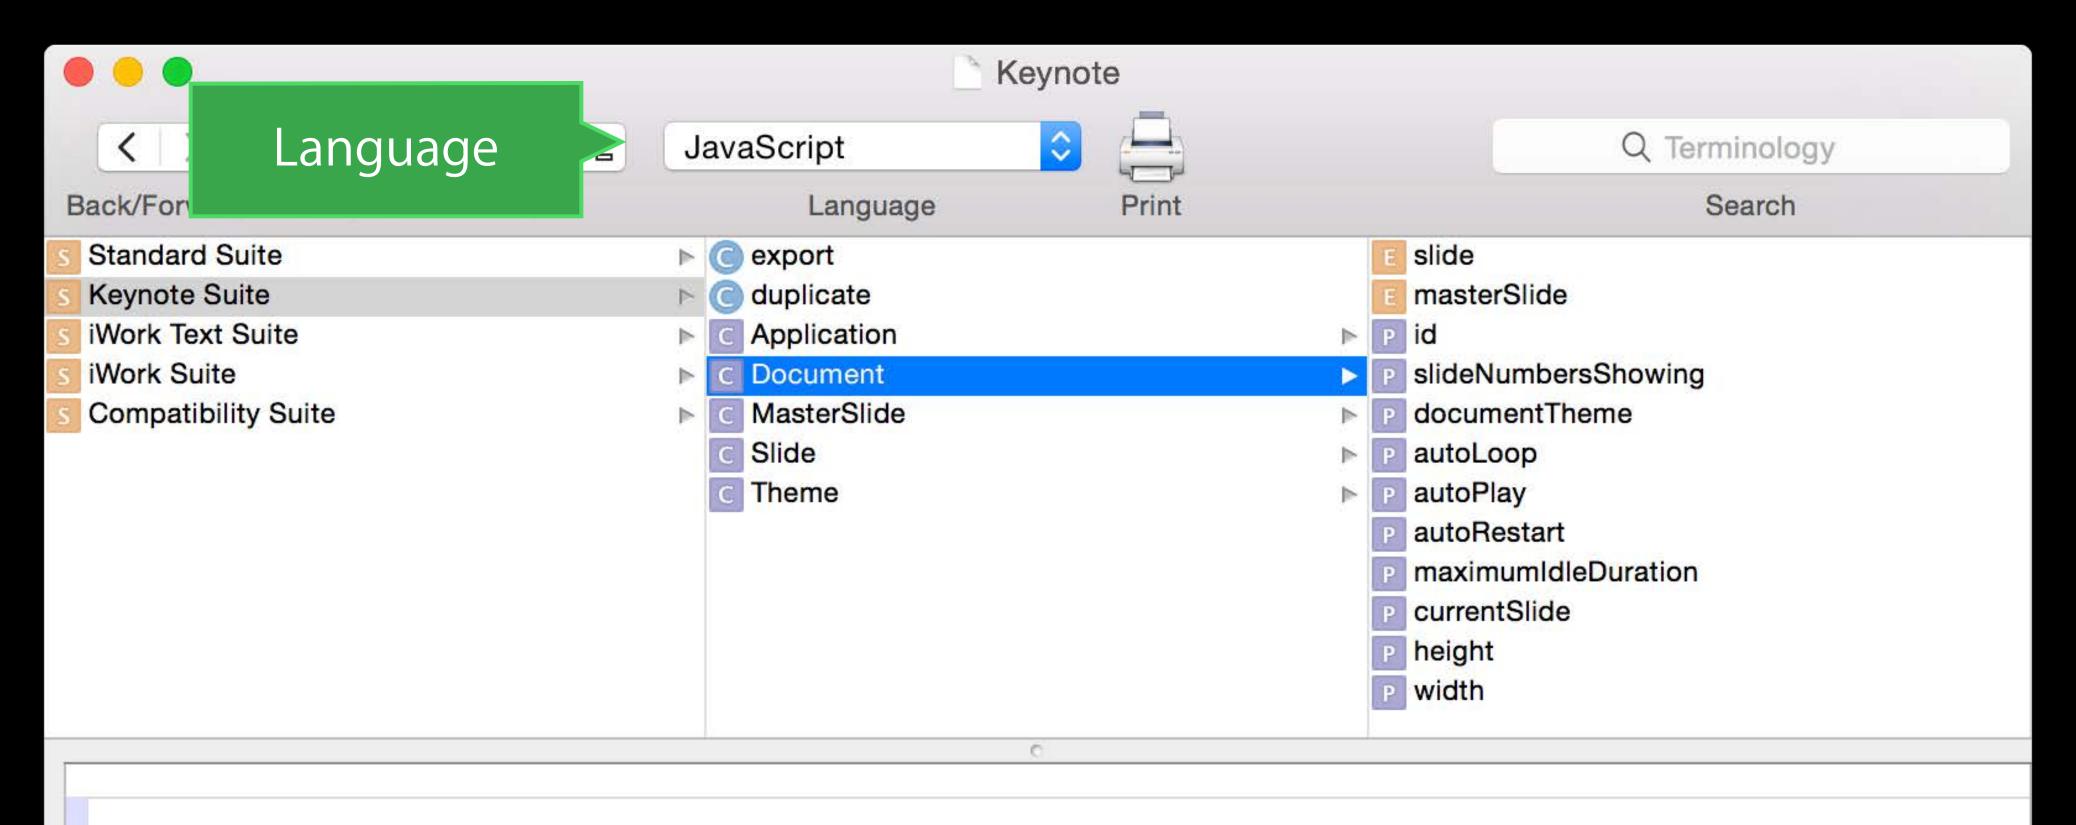

maximumIdleDuration (integer): Restart the slideshow if it's inactive for the specified time

currentSlide (Slide, r/o): The currently selected slide, or the slide that would display if the presentation was started.

height (integer): The height of the document (in points). Standard slide height = 768. Wide slide height = 1080.

width (integer): The width of the document (in points). Standard slide width = 1024. Wide slide width = 1920.
